Profile:

An ambitious game development student with a desire to break into the game development industry.

I am motivated to keep improving my skills and to learn new skills, both inside and outside of the industry, and often look for the next thing to learn the ropes of.

Having knowledge of both programming and sound design, I have often worked on multiple sides of a game development project, which led me to acquire skills in multiple areas of the game development process.

Education:

Parcival College: VMBO-TL / MAVO; 2014 – 2019. | Completed

Noorderpoort : Software Developer Games. | Current Study.

Skills:

- C#
- Unity Game Engine
- Sound Design & Music Composition
- Basic 3D Modeling
- Basic Web Development

Work Experience

Junior Developer Internship | Sfinx Games, Groningen | sept 2022 – feb 2023

- Programmed in C# for a game project in Unity.
- Tested several projects while documenting bugs and points of improvements.
- Improved the atmosphere of an existing project by designing fitting sounds.
- Composed two soundtracks for two different games.

Extra-curricular Experience:

Global Game Jam:

I have taken part in each edition of the Global Game Jam since 2020, during which I constructed the atmosphere for the games by composing soundtracks and sound effects, as well as assisting in programming where needed.

Hobbies:

In my past time, I like to produce electronic music, play electric guitar, and edit videos with clips taken from games I've played.
